

# SCOUTS | TERRAIN

## The latest news and information

October 15<sup>th</sup> 2021

As part of the ongoing commitment to Scouts | Terrain, there are two streams of work that continue to update and improve the system – monthly support and maintenance plus an annual development period, as detailed in previous updates.

The month of October could yet prove to be a big one for Scouts | Terrain. This month we are anticipating a release of some significant updates to the programming area of the system.

We know that programming has been an area that many people have raised an issue with. We must also acknowledge that the existing flow may have been working for some members, there were many others who have been asking for enhancements. Over the last few months, we have invested into updating programming based on the feedback articulated by our users.

With the next release, we will see:

- The ability to relate a programmed activity to Outdoor Adventure Skills
- The ability to relate a programmed activity to Logbook
- The ability to have the attendance and participation lists as separate records
- The ability to toggle calendar views and select which calendars are displaying for you, based on the Groups/Units/Patrols/Project Patrols you are a member of
- The ability to subscribe to your Scouts | Terrain program/calendar and include it in your iCal/Google/Exchange calendar
- A more efficient programming step process, such that you will not be returned to the calendar multiple times in the planning and/or reviewing process

The release is anticipated to occur in the week ending October 29<sup>th</sup> 2021.

The team looks forward to being able to provide you with another update shortly!
